8 Metres	> 80W
9 Metres	> 90W
>14 Metres	> 150W

DESCRIPTION

LED Neon flex is a flexible light tube designed to produce an ambient linear lighting effect and is perfect for single use display lighting. PVC totally diffused, 'no shadow' no spots and flexible.

It's durable IP65 body allows for installations both in and outdoors where light water exposure may occur.

Neon flex can be used in some instances to replicate traditional neon where fragile glass isn't suitable. Neon flex can be run in up to 14 metres using a 24v LED driver. The neon flex is supplied in a 50m drum but we can cut and supply per meter in customised lengths. This side view neon flex is 18mm x 16mm high. Fully dimmable using a dimmable led power supply.

For a working Neon Flex installation you will need:

- Neon Flex LED
 - 1 x Neon Flex Power Cable
 - 1 x Neon Flex Connector Pin
 - 1 x Neon Flex End Cap
 - 1 x 24V Power Supply
-
